DETAILED ACTION

1. This is in response to the Applicant's arguments and amendments filed on May 22, 2006 in which claims 1-4, 10, and 12-20 have been canceled, claims 5, 9, and 11 have been amended. Claims 5-9 and 11 are currently pending.

Allowable Subject Matter

2. After a further search and thorough examination of the present application and in view of the applicant's arguments, claims 5-9 and 11, renumbered as 1-6, are found to be in condition of allowance.

3. The following is an examiner's statement of reasons for allowance: the cited prior arts teach a mobile unit that has suffered a service interruption can initiate a reconnection by sending a call origination message into the network, but the call origination message is not associated with a suspended call session.

On the other hand, the Applicant teaches a mobile unit can initiate or decline reconnection to a suspended call session, if a mobile originated reconnect (MORC) message is received before expiration of a waiting period, reconnecting the mobile unit to the suspended call session, yielding a connected call, the reconnecting step comprising retrieving session information associated with the suspended call session of the mobile unit, yielding retrieved information; and reconnecting the mobile unit to the one or more participating units identified in the retrieved information. These limitations, in conjunction with all limitations of the independent claims have been disclosed, taught, or made obvious over the prior art of record.

The Applicant further teaches if a mobile originated reconnect (MORC) message is received before expiration of a waiting period, entering a reconnecting call state and reconnecting the mobile unit to the suspended call session, yielding a connected call, and entering a connected call state if the mobile unit is reconnected to the suspended call before expiration of the waiting period. These limitations, in conjunction with all limitations of the independent claims have been disclosed, taught, or made obvious over the prior art of record.

The Applicant further teaches entering a reconnecting call state after issuing the MORC message, to wait possible reconnection of the call, and if the suspended call is reconnected before expiration of the waiting period, entering a reconnected call state and resuming the call; otherwise entering an idle call state and ending the suspended call if the mobile unit is not reconnected to the suspended call before expiration of the waiting period. These limitations, in conjunction with all limitations of the independent claims have been disclosed, taught, or made obvious over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
